

**Purpose:** Understand what types of information should not be shared online.

**1. Once I've shared a secret online, I can always control where it goes.**

**2. Posting my home address and phone number online is usually safe.**

**3. It's important to respect other people's privacy choices, even if they are different from my own.**

**4. It's easy to know whether people are who they say they are online or whether they are pretending to be someone else.**

**5. People posting or creating content online can decide what to include or leave out. This is called framing.**

**6. People's online posts, comments, photos and videos always reflect their true selves.**

**7. You should always ask your friends before posting pictures, videos or information about them online.**

**8. Sharing passwords online is a good way to build trust with friends.**

**9. Different situations call for different levels of privacy, both online and offline.**

**10. It's important to think about how different people may interpret the information you share online.**

A collection of hand-drawn icons representing various digital and communication concepts. The icons include a laptop, an envelope, stars, a question mark, a monitor, a cloud, a speech bubble, a heart, headphones, a checkmark, a smartphone, and a robot holding an envelope. The drawing style is simple and sketchy, using black outlines and blue fills. The icons are arranged in a scattered, overlapping manner, suggesting a variety of digital tools and concepts.

Answers:

## CyberSmart or CyberSorry

1. **False.** Once you post anything online, it is impossible to always control where it ends up. That's why it's important to be careful what you share.
2. **False.** It is never safe to share personal information (like your address or phone number) online, even through direct messages or chats to friends.
3. **True.**
4. **False.** It is not easy to know what is real and what is fake online. If someone seems questionable, ask a trusted adult whether it might be someone pretending.
5. **True.**
6. **False.** Sometimes people don't tell the truth about themselves online.
7. **True.**
8. **False.** Even if you trust your friends, you should never share your passwords with anyone unless it's an emergency.
9. **True.**
10. **True.**
